

### Features and Benefits

- Ultra thin 1/2U chassis conserves space
- Supports up to eight full duplex links
- Eight optical TAP modules support optical network options allowing mixed media & split ratios
- Each module has two full duplex links to conserve space & maximize TAP density
- Optical devices requiring no power source to operate

### System Chassis

- TAP-200: 1/2U chassis supports up to 4 modules

### System Modules

- TAP-251: 50/50 multimode, 850nm, 50 $\mu$  (1/10G)
- TAP-252: 50/50 multimode, 850nm (10G)
- TAP-253: 50/50 singlemode, 1310/1550nm (10G)
- TAP-255: 50/50 multimode, 1310nm LRM (10G)
- TAP-261: 60/40 multimode, 850nm 50 $\mu$  (1/10G)
- TAP-262: 60/40 multimode, 850nm 62.5 $\mu$  (1/10G)
- TAP-263: 60/40 singlemode, 1310/1550nm (10G)
- TAP-271: 70/30 multimode, 850nm 50 $\mu$  (1G)
- TAP-272: 70/30 multimode, 850nm 62.5 $\mu$  (1G)
- TAP-273: 70/30 singlemode, 1310/1550nm (1G)
- TAP-275: 70/30 multimode, 1310nm LRM (1G)
- TAP-453: HighFlow 50/50 singlemode, 1310/1550nm (10/40/100G)

### Product Description

With the modular G-TAP system, you can tap up to 8 optical uplinks. G-TAP is the highest density and most economical optical tapping system in the industry.

The modular G-TAP design allows management of individual TAPs/links without effecting other TAPs/links and enabling a mixture of 10G and 1G, or singlemode and multimode in the same chassis. G-TAP is totally photonic for absolute fault tolerant.

The external G-TAP system complements the Gigamon industry leading GigaVUE Traffic Visibility Node, combining high TAP density, optimal use of rack space, and value-pricing to create a flexible, one-stop connectivity solution.

### The GigaVUE-212 Family

- GigaVUE-212, base chassis with twelve 1G & two 10G ports
- GigaPORT copper or optical 4-port expansion module

### The GigaVUE-420 Family

- GigaVUE-420 base chassis with four 10G & twenty 1G ports
- GigaTAP dual fault-tolerant taps for copper or optical links
- GigaPORT copper or optical 4-port expansion module
- GigaLINK copper or optical 10 GigE port module

### The GigaVUE-2404 Family

- GigaVUE-2404, base chassis with twenty-four 10G & four 1G ports
- 10-GigaTAP, dual fault-tolerant 4 TAP blade for optical
- GigaPORT-8, expansion with 8 optical 10G ports per blade

### The GigaVUE H Series Family

- GigaPORT-X12G04 | Twelve 10G & four 1G ports
- GigaPORT-X04G44 | Four 10G & Forty-four 1G ports
- GigaPORT-Q02X32 | Two 40G & Thirty-two 10G ports
- GigaPORT-X12-TS | Four 10G Time-stamping ports
